# security Patrol system

## What is QR Patrol

QR Patrol is a modern real-time solution using all the latest technologies to streamline and optimize organizations' guard tour activities. It is a sophisticated, yet user friendly application that guarantees:

- ✓ Increased Performance
- ✓ Cost Savings
- ✓ Enhanced Worker Safety
- ✓ Improved Decision making
- ✓ Transparency – Accountability
- ✓ Proving your work towards your clients

## QR-Patrol System

The best real-time guard tour monitoring system

The **QR-Patrol** monitoring system is based on cloud technology and the use of Smartphones/Tablets. It **consists of**:

- ✓ a **web application** used by the monitoring center to manage and monitor the guards and their patrols. Since QR-Patrol uses cloud technology, there is no need for installation of software.
- ✓ a **mobile application** used by the guards to perform their patrols. It has a **user friendly interface that requires minimum training** and can be downloaded for free from the PlayStore or the AppStore to the guards' smart devices

## Multiple Devices Use

No device limit – Use anywhere and everywhere

**Android application**  
Download QR-Patrol for Android:  
[QR-Patrol in Android market](https://play.google.com/store/apps/details?id=id.com.qim.qrp)

**Web application**  
QR-Patrol in the Web:  
<https://followmystaff.com>

## QR-Patrol PRO

Provide additional solutions to sky-rocket QR-Patrol benefits!

QR-Patrol PRO, the evolution of QR-Patrol, provides extra applications and features to benefit from!

**QR-Patrol M.A.R.S.** is a mobile application for the monitoring center/managers, which allows them to have access to the system and **monitor the guards even when being out off office/ on the road**. Like the cloud-based application, it can also be used by the end clients!

**QR-PTT**, i.e. "Push To Talk" over IP, is an Android/iOS based app that helps guards and lone workers communicate instantly (orally or via text messages) with each other. **A modern walkie talkie!**

## 3play technology

We offer 3 types of checkpoints

**QR-Code**  
Place QR-code on assets and scan with your smartphone.

- ✓ Simplicity
- ✓ Cost Friendly
- Ability to add Company Logo

**NFC tag**  
Just pass the smartphone over the NFC tag to scan it.

- Cannot be copied
- Longevity
- Perfect for low light conditions

**Beacon**  
Beacons enable remote verification of checkpoints.

- ✓ Remote Scanning
- ✓ Automatic Scanning
- Efficiency

## Guard Tour Systems

Cloud vs Traditional Security Systems

**Cloud guard tour systems**

- Real-Time information with minimum infrastructure cost
- Improved flexibility – Management and monitoring from everywhere
- No need of time-consuming hand-written reports
- Automatic software updates
- No need for disaster recovery plan

**Traditional guard tour systems**

- Infrastructure cost – Server maintenance
- Limited in-house management – monitoring ability
- Limited control on guards reliability
- No system updates or improvements
- Need for constant files backup

**QR-Patrol PRO**

Provide additional solutions to sky-rocket QR-Patrol benefits!

QR-Patrol PRO, the evolution of QR-Patrol, provides extra applications and features to benefit from!

**Man Down functionality** A clip device attached to the Guard can detect dangerous situations and automatically send SOS alerts! **Get instant SOS messages when a guard gets attacked, has an accidental fall, fades etc.**

**API - Minimize complexity through integration.**  
It can be used to connect QR-Patrol to 3rd party systems! The possibilities are limitless: **from connecting QR-Patrol to Alarm call centers/CMS to create a unified platform, to adding more value to your current applications (ERP etc.)**

**QR-Patrol PRO**

Provide additional solutions to sky-rocket QR-Patrol benefits!

QR-Patrol PRO, the evolution of QR-Patrol, provides extra applications and features to benefit from!

**External BLE SOS button** Enhance your guards' security level by using an **external BLE SOS button**. Imagine a scenario where a guard is in a difficult situation and cannot reach to his mobile device to send an SOS Event. **By simply pressing the External SOS Button the monitoring center immediately gets notified about his dangerous situation.**

**Mobile Forms – Replace exhaustive paper reports**  
Gather quality data from guards at certain points of importance and/or provide valuable instructions to them by attaching a Form at specific checkpoints. **Info about Room & Machinery conditions (i.e. temperature, pressure), certain procedures to be followed at any point etc. ensure the best operational performance.**

## QR-Patrol GOLD

The Ultimate weapon to master your security guard tours

QR-Patrol GOLD, the evolution of QR-Patrol PRO, provides extra applications and features to benefit from!

**Guard Trail:** Security Administrators can now have full control over the patrols executed: Guard Trail feature enables the drawing of a path line on the map. You can even play the guard trail on animation!

**Logo on Reports & Guard Photo:** Subscribers of GOLD version plans can now upload their own company logo on the system, which is included in the exported reports!

## QR-Patrol GOLD

The Ultimate weapon to master your security guard tours

QR-Patrol GOLD, the evolution of QR-Patrol PRO, provides extra applications and features to benefit from!

**Advanced Customized Report Tool:** The advanced customized reporting tool will enable you to create any report you may imagine using data from your QR-Patrol account. Additionally, we've gathered the most wanted reports based on your valued feedback, that will be included in a new, ready-to-use collection available for GOLD users!

**Virtual Checkpoints:** Virtual Checkpoints eliminate the need of physical checkpoints. You will define an area per each "checkpoint", and if the guard position is within that area the scanning can take place automatically without any further action needed!

## QR-Patrol - some key-point features

An example selection of key features

**Beacons**  
Define their transmit range as you wish to, use automatic scanning. **Using beacons as checkpoints is great for vehicle external patrols and armed patrols.**

**Multiple SOS notifications**  
Choose between within-app SOS, External BLE SOS button, or MANDOWN with clip wearable; all types trigger 3ple notifications: web-app notification, email sending, SMSs

**Work offline**  
In case there is no internet connection, Guards can continue their patrol normally and send any type of event - all data are stored locally within the phone app and will be submitted to the system with the correct information (timestamp, Guard position at the time of the event creation etc) once stable connectivity is found either via mobile data or Wi-Fi.  
\* SOS (as long as there exists GSM coverage) can trigger SMS alerts

**Indoor location**  
Working **underground or in a basement?** Use beacons to overcome physical restrictions (areas with no GPS coverage) and accurately locate guards with precision better than GPS!

## QR-Patrol - some key-point features

An example selection of key features

### 2way communication

Ability to send a message to your Guard(s) within the app

### Timeline

Timeline tab: **Instantly overview what's done and what needs to be done** (view all scans recently performed/ to be performed according to your schedules)

Pending Actions tab: items that are pending some action (i.e. a missed scan of a checkpoint) to allow you to control them and take action

### Geofencing

Be informed of whether a checkpoint is scanned by the Guard within its pre-defined area or not, **so QR Codes cannot be copied**.

### Tracking

Get informed of a Guard's position without them needing to scan any tags/checkpoints

### End Client Log-in

Guarantee your services towards your clients! Provide your clients with their own credentials, to login and view events related to their sites in real time, 24/7!

### Scheduled Client Email Reports

Automate the reporting process towards your clients. Customize the frequency to suit the client particular needs. **Let them know they are protected at anytime!**

## QR-Patrol Architecture

Every necessary measure has been taken in order to ensure the safety of the system and our clients' data;

- Data are stored to our own servers
- SSL encryption is used for all communication
- Data are mirrored in more than 1 servers

All the necessary measures have also been taken in order to offer high availability of all services

## How to use

Follow 6 simple steps

Place QR codes / NFC / Beacons on each territory

Scans QR code / NFC tag via the mobile application

Assign each QR-code/NFC tag to a checkpoint

The guard starts a patrol tour

An immediate alert is sent informing about guards' activity.

The guard is getting on other checkpoints

## Wide Range Application

Supervise all of your territories

**QIM**

## QR-Patrol - some key-point features

An example selection of key features

- Fully Flexible Scheduling**  
Not all organizations have the same needs. Support of fully customizable scheduling (users can create draft schedules, make changes, activate them, delete/cancel them (history is maintained), multiple Guards can be assigned to a schedule, daily/weekly/monthly/list view is available etc)
- Advanced Reporting**  
Advanced reporting capabilities available
- Multiple Access Levels**  
Ability to organize your account to branches & provide multiple users with their own credentials and respective access levels
- Custom maps upload**  
Ability to upload your own custom maps to the system and view your Guards actions on the Events Browser on top of your personal maps layers, thus having a much more personalized view
- Customized Translations**  
The system is already available in 18 languages; more languages or specific labelling (customized translation of QR-Patrol features) can be added easily
